Species Spotlight

Spotted Towhee

Pipilo maculatus

The Spotted Towhee is a large, handsome sparrow, often heard before seen, hopping about in the dry brush. They can be difficult to spot among the dry brown leaves; your best bet to catch a glimpse of this beauty is to walk slowly along the edge of a forest, brushy edges or undergrowth. Listen for it’s cat-like mewing call or rapid, buzzy song. The Spotted Towhee lives in the Northwest year-round, so there are plenty of chances to get out, visit the Refuge, catch a glimpse, and enjoy all that nature has to offer. Keep Reading...

Your Refuge, Your Way

Let Us Know What You Think!

This area will feature questions regarding particular topics on the refuge, and what you think about it! First up, as winter closes in, the chances of inclement weather closures of the River ‘S’ rise substantially. Last year, we made an effort to email our members and mailing list every time the refuge closed, which ended up being quite a few times. Did you appreciate the emails or hate them? Would you like to see a few, but don’t need one every time? Let us know!

What is all that on the red stuff on the water?

We are often questioned about the “red stuff” on the sloughs and ponds at this time of year. What is that stuff? It is called Mexican Water-fern, Azolla mexicana, and is also known as mosquito fern. Keep Reading...

Update & Events

For Educators:
- Classroom Visits
  As part of a pilot program to be more equitable to our surrounding communities we are offering in-classroom presentations to elementary grades every Thursday in February and March. We hope this will make our programming available for those schools that are not able to attend an on-site trip. In order to serve as many students as our resources allow, classrooms that participate in this program will not be eligible for an on-site field trip in the same school year. (Please stay tuned for the in-classroom program description)
  *Middle and high school teachers interested in classroom programs please contact the Refuge directly.
  Application Period: January 1st through January 31st
  Applications will only be accepted through our online form. A link to the form will be available here during this time period.

- Spring 2018 Field Trips
  Field Trips during the spring of 2018 will be offered in the months of May and June. The month of April will be reserved for training volunteers so that your experience on-site is both accurate in its content as well as engaging to your students. Up to three classes (max 90 students) can be accommodated each day, Tuesday through Friday. Programs are NOT offered on Mondays. Programs are free and reservations are taken on a first come first served basis.
  Application period: February 1st through March 15th
Applications will only be accepted through our online form. The link to the form will be available here during this time period only.

*Ridgefield School District Teachers - Please contact the refuge directly about current programming.

- Teacher Orientation (REQUIRED)
  As part of our education program improvements we are requiring one representative from each field trip day to attend an Orientation on one of the following days. This is required for every school, no matter your involvement in field trips or training opportunities in the past. Attendance to these events is good for three years. Orientation will include important logistics, expectations, potential activities and their content, and give educators a chance to give feedback and ask important questions.

  Space is limited to please sign up at Ridgefieldeducation@fws.gov for the first date you are available.
  - January 27th

Habitat Restoration
Updates & Events

Egrets, the strong, silent type of the animal kingdom

I started here in mid-January 2017. In fact, I started closer to the end of January due to quite a few days of weather closures. Snow! On one of my very first days on the job I watched a coyote nimbly trot through snow on the River 'S' Unit.

By the spring, Gee Creek was so high the term “creek” was an aspersion. You could say the rains dampened our restoration efforts. This was in stark contrast to our summer efforts, where for weeks the only rain we may have received came in the form of ash from nearby wildfires. Only when fall came did we feel any sense of normalcy, except, by December it stopped raining again! It was gloriously sunny during the day, and by night we got a short spell of a brilliant super moon. Keep Reading...
